

Open Awards Qualification Unit

This unit forms part of a regulated qualification.

1 Unit Details

Unit Title:	The Human Body
Unit Reference Number:	M/650/3450
Level:	Entry Level Two
Credit Value:	3
Minimum GLH:	30

2 Learning Outcomes and Criteria

Learning Outcome (The Learner will):	Assessment Criterion (The Learner can):
1. Know about the structure of the human body	1.1 Identify bones and joints in the human body
	1.2 Identify muscles and organs in the human body
	1.3 State the function of: <ul style="list-style-type: none">• Bones and joints• Muscles• Organs in the human body
2. Know about teeth in humans	2.1 State how many teeth human adults normally have
	2.2 State how many teeth human children normally have
	2.3 Name one natural material found in human teeth
3. Know the major organs and organ systems in the human body	3.1 Name the major organs in the human body
	3.2 Identify organ systems in the human body
	3.3 Give the positions of major organs and organ systems in the human body
4. Know about the human circulatory system	4.1 Identify organs and organ systems involved in the human circulatory system

		4.2	State the function of the organs and organ systems in the human circulatory system
		4.3	Outline how blood is transported around the human body
5.	Know about the human digestive system	5.1	Identify the main parts of the human digestive system including: <ul style="list-style-type: none"> • Stomach • Liver • Intestines
		5.2	Outline the digestive process in humans
6.	Know about the process of respiration	6.1	Outline the process of respiration in humans
		6.2	Identify the organs involved in human respiration
		6.3	Outline the process of gaseous exchange in human lungs
		6.4	State the output from human respiration
7.	Know about the human reproductive system	7.1	Identify the organs and organ systems in the human reproduction cycle
		7.2	Outline the reproductive process in humans
