

# Open Awards Qualification Unit

This unit forms part of a regulated qualification.

## 1 Unit Details

|               |                              |
|---------------|------------------------------|
| Unit Title:   | Constructed Textiles Methods |
| QAC Code:     | T/504/4614                   |
| Level:        | Level 2                      |
| Credit Value: | 3                            |
| Minimum GLH:  | 24                           |

## 2 Learning Outcomes and Criteria

| Learning Outcome (The Learner will):                                                                         | Assessment Criterion (The Learner can):                                                                                                            |
|--------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Be able to use research methods and notation                                                              | 1.1 Collect and use appropriate supporting research and notation                                                                                   |
|                                                                                                              | 1.2 Select items from research to influence and develop textile work                                                                               |
| 2. Be able to experiment with the constructed textile process                                                | 2.1 Use and experiment with the constructed textile process to explore the following:<br>a) Colour<br>b) Texture<br>c) Pattern<br>d) Line and tone |
| 3. Be able to use technical equipment to produce samples of constructed textiles                             | 3.1 Using technical equipment, produce samples which show the scope and potential of equipment within constructed textiles                         |
| 4. Be able to demonstrate technical and theoretical information related to the areas of constructed textiles | 4.1 Apply technical and theoretical information to the practical process                                                                           |
| 5. Be able to explain historical and contemporary practice pertaining to constructed textiles                | 5.1 Describe examples of historical and contemporary practice and its relationship to practical work                                               |
| 6. Be able to identify and follow health and safety procedures                                               | 6.1 Follow Health and Safety procedures                                                                                                            |
