	4.2 Monitor and evaluate the effectiveness of communication practices to support positive outcomes for individuals
	4.3 Propose improvements to communication systems and practices and lead their implementation

## Assessment Requirements

This unit must be assessed in accordance with Skills for Care & Development assessment principles guidance.

This is a knowledge and skill-based unit.

Knowledge evidence may be generated outside of the work environment, but the final assessment and decision must show application of knowledge within the real work environment.

Learning Outcomes 3 and 4 are skill based, and primary evidence throughout the qualification should include observation of direct practice in the workplace in actual person.

It is acknowledged that remote observations could be used in appropriate circumstances, as an approach to enrich, enhance and triangulate main direct observations which have been carried out. Remote observations should not be planned and used as the primary approach. Safe and reliable approaches to use of remote technologies in the assessment process must be agreed with Open Awards prior to use. This should include how the privacy, dignity and confidentiality of any individual will be protected and robust evidence recording protocols.

## Indicative Content
